

Climate

Our annual carbon emissions

The innocent Scope 1, 2 and 3 greenhouse gas inventory has been prepared in accordance with the GHG Protocol Corporate Accounting and Reporting Standard using an operational control approach. Emissions were calculated using activity and operational data obtained from innocent's internal systems and key supply chain partners. Where primary data was unavailable, secondary data and estimation methodologies were used. Emission factors were sourced from recognised databases including DESNZ, IEA, Agribalyse, Ecoinvent and GLEC.

The GHG emission results below for the period 1 January 2025 to 31 December 2025 have been independently verified by BSI to ISO 14064-3 requirements. BSI is accredited by UKAS for greenhouse gas verification activities.

Results

How we did in 2025		
scope	location-based (tCO2e)	market based (tCO2e)
scope 1		
stationary combustion	1,877	1,877
refrigerants (fugitive emissions)	0	0
mobile combustion	358	358
scope 2		
electricity	7,964	22
scope 3		
purchased goods and services	105,745	105,745
purchased goods and services - FLAG	39,129	39,129
upstream T&D	67,655	67,655
downstream T&D	17,252	17,252
business travel	631	631
end of life sold products	141	141
Total	240,752	232,810

Exclusions

The following exclusions have been made:

Scope 3 category	Materiality of Emissions	Justification
3.02 Capital goods	Low	Excluded due to poor data quality at the time of reporting. Estimations of the category indicate low materiality.
3.03 Fuel and energy related activities	Low	Excluded due to poor data quality. Estimations of the category indicate low materiality.
3.05 Waste generated in operations	Low	Excluded as data was unavailable for this category. Waste data is assumption based and therefore plans are in place to capture verifiable data from 2026 onwards.
3.07 Employee commuting	Low	Excluded due to poor data quality which doesn't cover all countries.
3.08 Upstream leased assets	Low	Excluded due to materiality. Minimal activity, small leased spaces in shared offices.
3.10 Processing of sold products	Not applicable	In the years of calculation, innocent sold no products which were further processed.
3.11 Use of sold products	Not applicable	Excluded due to lack of data and estimated low materiality.
3.13 Downstream leased assets	Not applicable	In the years of calculation, innocent had no leased-out assets giving rise to reportable emissions under this category.
3.14 Franchises	Not applicable	In the years of calculation, innocent did not operate a franchise model and therefore has no emissions requiring reporting under this category.
3.15 Investments	Not applicable	In the years of calculation, innocent had no relevant investment activities requiring reporting under this category.
